

Weekly Disease Surveillance Report

2022 Reporting Week 20: May 15 — May 21

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

COVID-19 & ILI Trends

The trend of COVID-19 cases and percent positivity continue to rise. The [COVID-19 Community Risk \(Transmission\) Level](#) has increased to HIGH for Week 20. However, the [COVID-19 Community Level](#) indicator based on hospital impacts remains at LOW.

Influenza-like illness (ILI) activity plateaued this past week and remains above the normal trend for this time of year. Please see page 3 for information on ILI numbers in Okaloosa County.

COVID-19 Resources

NEW The CDC has developed a [Quarantine & Isolation Calculator](#) to help individuals determine how long to isolate, quarantine, or take other steps to prevent the spread of COVID-19.

NEW A new federal [Test to Treat](#) program gives people a fast and easy way to get lifesaving treatment for COVID-19. Through this program, if individuals test positive for COVID-19, they may be eligible to receive a prescription and have it filled all at one location. Individuals can also bring home testing results get evaluated by a healthcare provider for treatment.

Please visit the CDC's websites for COVID-19 [vaccinations](#) and, specifically, [booster](#) shots to stay informed with the most current information, and please continue to promote the COVID-19 vaccine as it is highly effective at preventing severe disease and death.

COVID-19 Snapshot

Week 20 Community Level

COVID-19 Community Level	New Hospital Admissions per 100K Population (Past 7 Days)	% Staffed Beds with COVID-19 Patients (Past 7 Days)
LOW	4.8	1.1%

PREVIOUS WEEK COMMUNITY LEVEL: LOW

New COVID-19 Cases Per 100,000 people in the past 7 days	Indicators	Low	Medium	High
Fewer than 200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-19.9	≥20.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%	10.0-14.9%	≥15.0%
200 or more	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	NA	<10.0%	≥10.0%

Week 20 Community Transmission Level

COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
HIGH	107.2	11.5%

PREVIOUS WEEK RISK LEVEL: SUBSTANTIAL

Low	<10	<5%
Moderate	10-49	5-7.9%
Substantial	50-99	8-9.9%
High	>100	>10%

Community Level and Community Risk/Transmission Level are the color of the higher risk level for each of the two indicators. Data Source : CDC [Community Indicators at the County Level](#)

The Florida Department of Health (FDOH) provides the Centers for Disease Control and Prevention (CDC) with county COVID-19 data, including deaths.

Please visit the [COVID-19 Community Profile Report](#) webpage to obtain death data by downloading the most recent excel file and locating Okaloosa on the 'Counties' tab.

For questions related to COVID-19 death data, please contact the FDOH Office of Communications at 850-245-4111 or NewsMedia@flhealth.gov.

COVID-19 VACCINATIONS		
Fully-Vaccinated Groups	OKALOOSA	US
% of Population ≥ 5 Years of Age	68.9%	70.7%
% of Population ≥ 12 Years of Age	74.7%	75.0%
% of Population ≥ 18 Years of Age	77.5%	76.5%
% of Population ≥ 65 Years of Age	95.0%	90.9%

Data reported through previous Sunday. Data Source: CDC [COVID Data Tracker](#)

Influenza-Like Illness

Week 20: May 15 – May 21

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

Figure 2: Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa county for the 2018-19, 2019-20, 2020-21, and 2021-22 influenza seasons by week. Data source: ESSENCE

ANALYSIS: During Week 20, flu reporting partners and ESSENCE (a syndromic surveillance system) reported a slight increase in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County slightly increased from 2.90% during Week 19 to 2.96% during Week 20. Flu partners reported 16 positive rapid flu tests this week (15 Type A, 1 Type B). Over the past three weeks, 18 out of 123 influenza specimens submitted to the state lab were positive (10 Influenza A unspecified, 3 Influenza A H3, 3 Influenza B unspecified, 2 Influenza A/B unspecified). There were no ILI admissions, outbreaks, or deaths reported this week. The percentage of total ILI ED visits for Week 20 is higher than that of Week 20 last year.

Note: Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

% ILI by Age Group Week 20, 2022

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	22	198	11.11%
5-19	16	313	5.11%
20-34	15	567	2.65%
35-54	11	672	1.64%
55-74	7	542	1.29%
75+	5	273	1.83%
